Reference is made to the following documents:

D1: US 6,343,326 B2 D2: US 6,351,465 B1

1. Novelty and Inventive Step

D1 discloses A system and method of transferring internet protocol packets using fast ATM cell transport.

D2 relates to A system using ATM switches as high performance Internet routers by standard ATM signaling to set up cut-through paths.

Although these two documents relate to the ATM router, None of these documents reveals the idea of switched router for transmitting IP packet data using SLA, ENLA and IFCA.

Moreover, It seems not obvious to derive the said idea from the said two documents

Therefore, novelty can be acknowledged for claim 1 - 2, also these claims involve an inventive steps.

2. Industrial Applicability

Claims 1 - 2 meet the criteria set out in PCT Article 33(4).
